**A TRADITION OF
MANUFACTURING
SINCE 1950**

THE VICE SPECIALISTS

It takes a special wherewithal, a certain kind of focus and an unremitting commitment to excellence for becoming a specialist in any field, let alone being recognized as such by peers and clients alike. Medallay Exports is at this perfect intersect...Known as the "Specialists' of Vices", it is one of the leading manufacturers & exporter of Vices. Our products have been created as a result of keen research to address the needs of all the segments of the Market.

OUR OBJECTIVE

"Building & Maintaining Strong long term business relationships for Mutual Benefit"

A HISTORY OF EXCELLENCE

Excellence flows in our genes and has been bequeathed by our forefathers...In the early 19th Century, East India Company - then the world's largest business enterprise, chose a few intrepid and enterprising India engineer entrepreneurs to supply Vices for their ships.

That spirit of enterprise and innovation shines on like a guiding beacon three generations later. What our great-grandfathers conceived, successive generations honed and steadily improved. All along pushing the envelope of excellence.

GOING BEYOND

Established in 1989 and conceived of a parent company that took shape in 1950, Medallay Exports is the perfect combination of the inherited and the acquired. Blending intrinsic knowledge that runs in our DNA with current best practices, methodologies and technologies to produce Bench Vices that bear our unmistakable stamp of quality.

In all our endeavors we strive to go beyond the expected, question the obvious and in the process find a better way of doing things. Aably led by Rahul Aggarwal who has learnt the business literally from ground up - he started out at the shop floor in 1984 - Medallay Exports is primed to deliver across a range of business partnerships. Our multi-faceted, cross-functional management team has a long-term exposure in international business needs and an unfailing perspective for the bigger picture is the reason behind our Global Footprint.

Thinking **BIG**

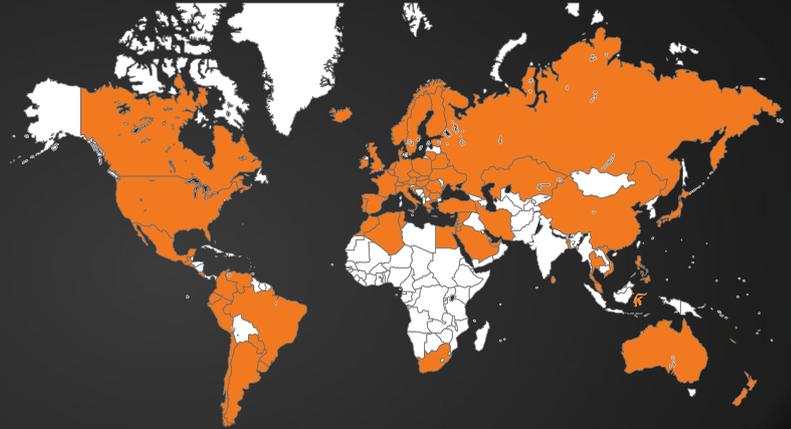

The prepared organization always plans for the future. Creates scale and capability to ride the crest of change and deliver the best to its customers. This foresight has resulted in the planned expansion to our new premises, in 2013.

With the New State of Art manufacturing facility online, Medallay Exports becomes the biggest manufacturer of Vices with in India with a covered area of approximately 55,000 Square feet.

It is one of the biggest, best, modernized & Hi-tech Infrastructure for producing Vices. Vices are produced 100% on VMC & Special Purpose Machines which helps further improve the quality, increase production capacity and reduce the cycle time of the entire manufacturing process.

As an aware organization, our focus is always on our Social Responsibility to minimize impact on the Environment and safety of our Human Resource. This has found expression in by adoption of Green Building Concepts like Solar Energy and Rain water Harvesting as a part of architectural design of the New factory and creating healthy, habitable residential areas for our employees.

Global Presence

We have gone far and wide to come close to you. Our intent is to create a global presence that can respond to your needs and queries with agility. Today, Medallay has a major presence in across the Globe, with a marketing and service reach across **70+ countries**.
